## PROFILE

---

A biotechnologist with a strong formation in different countries and a particular interest in regenerative medicine and health policies. Currently Vice-Chair of the European Health Parliament of Robotics, A.I. and precision medicine Committee in Brussels. The role aims to redefine European policies to include innovation into the healthcare systems, as well as to break the barriers between EU countries. Since 2010 is one of the co-founders of Equity in Health Institute, which aims to redefine the European public health budgets with the use of ELTIF and pension funds in order to include equity in health and health promotion to reduce the costs of the health care systems and to improve the quality of life of the patients. With INTEGRATE Think Tank has been involved in the economic field with topics like Long-term Investment and Social Infrastructures with the aim of creating an integrated project that can overcome the development differences between different EU Member States. This organization has collaborated with many international entities during the Italian Semester.

---
